n nQ: Wifi does not work under 19.10 I just installed Ubuntu 19.10 and the wifi is not working. It was not working on 18.10 either. Here's the output of lshw -C network *-network description: Ethernet interface product: RTL8111/8168/8411 PCI Express Gigabit Ethernet Controller vendor: Realtek Semiconductor Co., Ltd. physical id: 0 bus info: pci@0000:07:00.0 logical name: eth0 version: 09 serial: de:de:de:de:de:de size: 10Mbit/s capacity: 100Mbit/s width: 64 bits clock: 33MHz capabilities: pm msi pciexpress vpd bus_master cap_list ethernet physical tp mii 10bt 10bt-fd 100bt 100bt-fd autonegotiation configuration: autonegotiation=on broadcast=yes driver=r8169 driverversion=2.3LK-NAPI duplex=half firmware=rtl8168g-2_0.0.1 02/26/15 latency=0 link=yes multicast=yes port=MII speed=10Mbit/s resources: irq:175 ioport:4000(size=256) memory:fe2000000-fe2001fff memory:fe1800000-fe181ffff I tried everything I could but nothing worked. I tried uninstalling and reinstalling the wifi driver. This is how I installed the driver. sudo apt install --reinstall linux-firmware sudo modprobe -r r8169 sudo modprobe r8169 Any help is appreciated. A: One common reason for the problem is that the driver you were using didn't work with your hardware. You can check which drivers are available with: sudo ubuntu-drivers 82157476af
